

Abhishek Pandey

abhishek230102@gmail.com — +91 9022748721 — linkedin.com/in/abhishek-pandey-217a961b2

PROFESSIONAL SUMMARY

Databricks Certified Data Engineer Professional experienced in designing and building scalable ETL/ELT pipelines, backend services, and cloud-native data platforms. Skilled in metadata-driven architectures, event-driven systems, and automated CI/CD workflows. Strong expertise in Databricks, PySpark, Delta Lake, Apache Kafka, FastAPI, PostgreSQL, and Azure Data Services with focus on performance optimization, governance, and lifecycle management. Proven ability to deliver reliable backend and machine learning solutions across professional and freelance engagements.

TECHNICAL SKILLS

Programming: Python, SQL

Data Engineering: Databricks, PySpark, Delta Lake, Data Lakehouse, ETL, ELT, Data Modeling, Data Pipelines

Backend Development: FastAPI, REST APIs, Microservices Architecture

Databases: PostgreSQL

Streaming: Apache Kafka, Event-Driven Architecture

DevOps & CI/CD: GitHub Actions, Databricks Asset Bundles, Automated Deployments

Cloud & Data Services: Azure Data Factory, ADLS Gen2, Azure SQL

Monitoring & Logging: Splunk

Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Modak Analytics (Client: Humana)

India

Software Development Engineer

Oct 2024 – Present

- Led a 4-member team to deliver a governed self-service Data Product Platform enabling enterprise-wide data discovery.
- Designed scalable RESTful APIs using Python and FastAPI with PostgreSQL, improving metadata retrieval efficiency by **40%**.
- Built and optimized metadata synchronization ETL pipelines in Databricks/PySpark, processing **millions of records daily**.
- Automated CI/CD deployments with GitHub Actions and Asset Bundles, reducing release cycle time from **hours to under 15 minutes**.
- Architected Kafka-based event-driven communication, improving system scalability and decoupling.
- Integrated centralized logging into Splunk dashboards, reducing incident resolution time by **30%**.

Software Development Engineering Intern

June 2024 – Oct 2024

- Developed PySpark ETL pipelines in Databricks for structured and semi-structured datasets of **10M+ records**.
- Assisted in metadata catalog management, schema synchronization, and performance optimization.
- Contributed to backend API development, unit testing, and debugging, improving response times by **25%**.

Freelance Consultant

Jan 2021 – Sept 2022

- Delivered machine learning and computer vision solutions across multiple client engagements for academic and business use cases.
- Built OpenCV-based systems for object detection, image classification, automation workflows, and image processing solutions.
- Designed and implemented machine learning systems involving data preprocessing, model training, evaluation, optimization, and deployment support.
- Guided clients and junior developers on Python, OpenCV, and machine learning project execution through hands-on technical support.
- Managed project planning, requirement gathering, stakeholder communication, and successful delivery across multiple parallel engagements.

EDUCATION

Savitribai Phule Pune University

Master of Science (M.Sc.) in Computer Science

2024

CERTIFICATIONS

Databricks Certified Data Engineer Professional
